Data- Driven Recommendations

- Allocate higher marketing budgets during **Q2-Q3** to maximize returns when customer demand is already strong.
- Introduce light and time-bound promotions during low-demand months (**February, September and October**) to stabilize sales without impacting long-term profitability.
- Optimize staffing through flexible shift planning and temporary or part-time resources, rather than permanent workforce changes.
- Align ingredient purchasing with seasonal demand patterns to reduce food wastage and improve overall cost efficiency.
- Prioritize promotion of consistently **high-performing pizza categories** to maximize revenue using proven customer preferences.
